TECHNICAL SKILLS

Proficient: TypeScript, NodeJS, Ruby, Rails, CSS, HTM, JavaScript, Vue.js, React, NuxtJS, Heroku, Vim, Redis, PostgreSQL, DynamoDB, AWS Serverless, Docker, Kubernetes, ArgoCD, Shopify, Unit Testing, git

ENGINEERING EXPERIENCE

Ibotta   Remote
Senior Platform Engineer   *June 2022 - February 2025*
Platform Engineer   *June 2021 - June 2022*
- Developed AWS serverless and Express.js applications that yielded Ibotta millions of dollars monthly
- Adapted and extended complex legacy systems in React and Ruby on Rails to serve new business needs
- Collaborated extensively with technical and non-technical team members to establish clear, valuable goals
- Led technical discussions and documented team decisions in Architectural Decision Records (ADR).
- Took the initiative to achieve proficiency in Salesforce development to manage client data
- Owned every part of the development lifecycle: planning, story creation, spikes, ADRs, code contributions, deployments, testing, monitoring, and verifying that code is live in production
- Methodically and reliably resolved complex on-call issues on business-critical applications in production

King & Partners   New York, NY
Senior Full Stack Software Engineer   *January 2019 - June 2021*
Full Stack Software Engineer   *January 2018 - January 2019*
- Developed responsive websites in collaboration with a designer using Ruby on Rails.
- Collaborated actively with project managers to communicate timelines and expectations.
- Taught myself Shopify development and launched an e-commerce Shopify site.
- Built custom integration on Node.js for a Shopify site, resulting in a virtual showroom for bridesmaids dresses.
- Migrated a Magento e-commerce site to Shopify.
- Taught myself NuxtJS and Vue.js to build a statically generated site, twinstarhome.com

Electric   New York, NY
Full Stack Software Engineer   *January 2017 - December 2017*
- Developed a web-based help desk application with Ruby on Rails and React to scale our IT support services.
- Built a registration platform in Express and React to streamline our customer onboarding process.
- Prototyped Lambda processes with DynamodDB which lead to scalable storage of valuable customer data.

Prolific Interactive   New York, NY
Mobile API Engineer - Freelance   *October 2016 - January 2017*
- Developed legacy (Node v0.10.12) APIs to release three iOS and Android versions for David's Bridal.

Boom Fantasy   New York, NY
Software Engineer   *May 2016 - August 2016*
- Rewrote a Meteor application to prepare the company for its busiest sports season -- American football.

Dash Software *(acquired by Reserve)*   New York, NY
Software Engineer   *October 2014 - May 2016*
- Created a bill splitting feature in Ruby that differentiated our application's offering from our competitors.
- Stabilized and refactored a Rails API for iOS and Android mobile apps.
- Introduced and standardized essential testing practices for the entire engineering team.

EDUCATION

Boston University   Boston, MA
Bachelor of Arts, Philosophy   *2005 - 2009*

NON-ENGINEERING EXPERIENCE

Grassroots.org   New York, NY
Product Manager / Community Manager   *January 2013 - September 2014*
- Planned and coordinated development of online community platform to help our charities with tech needs.

UbiQus Reporting Inc.   New York, NY
Account Manager   *February 2011 - January 2013*
- Consulted with clients in documenting or translating their confidential information.

Tour Egypt   Cairo, Egypt
Customer Service Representative   *December 2009 - July 2010*
- Advised clients on traveling to Egypt and communicated in Arabic with Egyptian management and staff.
